Installation notes 1: Not all vehicles are compatible with a hardwire starter disable feature & may require additional installation time and parts. Please note that the starter disable feature should NEVER be connected in a manner that would disable a vehicle's driving ability if being driven at the time of receiving disable command.

Installation notes 2: The Commander uses a databridge to communicate with 'Smartphone Ready' Solace and Titan brand remote starters, Fortin, ADS and DEI bypass modules using Standalone or Remote Start firmware.
